Abstracts

High Strength High Modulus Polyvinyl alcohol fiber is a synthetic fiber made from polyvinyl alcohol. It has good affinity acid resistance with cement. Mainly used for concrete products, such as proximate matter or sheet material, suppress micro-cracks caused by plastic shrinkage of concrete. It is become a new material to replace the asbestos as the reinforced material of cement products. It has soft and warm properties, especially the moisture absorption rate (up to 5%) is relatively high in the variety of synthetic fiber, so it is known as synthetic cotton. It has already been widely used in engineering fields railway, water conservancy etc.
