## Abstracts

According to our (Global Info Research) latest study, the global High-strength PBAT market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Polybutylene adipate terephthalate (PBAT) is a biodegradable and compostable polymer that is known for its flexibility, toughness, and good processability. High-strength PBAT is an enhanced version of standard PBAT, designed to offer improved mechanical properties such as tensile strength, elongation at break, and impact resistance. This makes it suitable for applications that require both biodegradability and higher performance. By improving the polymer's strength, it becomes more versatile for a wider range of applications, including those that traditionally rely on conventional, non-biodegradable plastics.

The Global Info Research report includes an overview of the development of the High-strength PBAT industry chain, the market status of Agricultural (Nanocomposite PBAT, Chain Extender Modified PBAT), Packaging (Nanocomposite PBAT, Chain Extender Modified PBAT), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of High-strength PBAT.

Regionally, the report analyzes the High-strength PBAT markets in key regions.
