The global High Temperature Aerogel Blanket market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The high temperature aerogel blanket market refers to the market for aerogel insulation blankets designed to withstand high temperature environments. Aerogel is a high-performance insulation material with unique properties such as low density, high porosity, and high surface area. High temperature aerogel blankets provide excellent insulation performance in high-temperature environments and are also lightweight, flexible, easy to install, and maintain. As a result, they are widely used in a variety of high-temperature environments.

Applications for high temperature aerogel blankets include the petrochemical, power, metallurgical, and aerospace industries, among others. The primary application is in the petrochemical industry for insulating high-temperature pipes, heat exchangers, storage tanks, reactors, and other equipment.

As energy efficiency and emissions reduction requirements continue to increase, and as the use of high temperature aerogel blankets becomes more widespread across industries, the market for high temperature aerogel blankets is expected to continue to grow. Some of the major players in this market include Aspen Aerogels, Cabot Corporation, Jios Aerogel, Nano High-Tech, among others, who provide high temperature aerogel blankets with different properties and applications to meet the needs of various industries.
