Abstracts

HTI products are used for application requiring high temperature, which is more than 1,000 c. The major function of HTI products is to conserve energy by reducing heat loss, controlling surface temperature, increasing operating efficiency of ventilation and reducing or preventing the damage of equipment.

SCOPE OF THE REPORT:

This report focuses on the High Temperature Insulation (HTI) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The major benefits offered by HTI products are sustainability at high temperatures and high compressive strength. High temperature insulation products are widely used in industrial applications, fire protection and emission control applications. Some of the industries where HTI products are used widely are petrochemicals, refractory, metallurgy, glass, cement, aluminum and others. Petrochemicals and glass industries together consume more than 40% of the total HTI products market.

The worldwide market for High Temperature Insulation (HTI) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
