Abstracts

The global High Temperature Polyamides market size is expected to reach \$ 4502 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032).

Polyamides are probably the most successful polymers in the field of highly technical applications. In the past few decades, we have witnessed the introduction of nylon as a replacement for metals and thermosetting materials in many applications in all industrial sectors. As is well known, nylon is a primary choice for applications at high temperatures, due to its excellent thermal resistance. In general, high temperature polyamides should have a heat resistance temperature of more than 200 degrees Celsius.

China is the largest market with about 28% market share. Europe is follower, accounting for about 25% market share.

The key players are DowDuPont, DSM, EMS-GRIVORY, Solvay, Mitsui Chemicals, Kuraray, BASF, Evonik, Genius, Kingfa etc. Top 3 companies occupied about 62% market share.

This report studies the global High Temperature Polyamides production, demand, key manufacturers, and key regions.
