According to our (Global Info Research) latest study, the global High-Temperature Screw Conveyor market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

High-temperature screw conveyor is a screw conveyor designed to handle materials at high temperatures, typically for temperatures above 200°C (392°F)?. This kind of screw conveyor is widely used in industrial processes, such as cement production, power generation, chemical industry, etc., and can provide cooling effect while conveying materials. The high temperature screw conveyor is composed of a hollow screw and a conveying pipe, and the material is moved by the rotation of the screw. The outer cylinder of the high-temperature screw conveyor is usually provided with a jacket of a certain length, and the jacket is filled with a cooling medium, such as water or air
