According to our (Global Info Research) latest study, the global High Velocity Oxygen Fuel (HVOF) Spraying Service market size was valued at US\$ 2123 million in 2025 and is forecast to a readjusted size of US\$ 3206 million by 2032 with a CAGR of 6.1% during review period.

High-velocity oxygen fuel (HVOF) spraying service is an advanced thermal spraying technology that utilizes the high-temperature, high-pressure gas flow generated by the high-speed combustion of fuel gas and oxygen in a spray gun combustion chamber to heat metal or ceramic powder to a semi-molten state and spray it onto the substrate surface at supersonic speed, thereby forming a dense, high-bonding-strength, low-porosity functional coating. This service is widely used in the surface strengthening and repair of components, extending equipment lifespan by improving wear resistance, corrosion resistance, oxidation resistance, and fatigue resistance. It is an important surface engineering solution in aerospace, energy, power, petrochemical, and high-end manufacturing sectors.

With the upgrading of global high-end manufacturing and the popularization of equipment lifecycle cost management concepts, the demand for high-velocity oxygen fuel (HVOF) spraying services continues to grow. On the one hand, aerospace, gas turbine, and new energy fields are placing higher demands on the wear and corrosion resistance of key components, driving the expansion of high-performance coating technology applications. On the other hand, traditional industries are increasingly relying on advanced surface engineering technologies such as HVOF to reduce downtime costs in equipment maintenance and remanufacturing. Simultaneously, increasingly stringent environmental regulations are driving the demand for green processes to

replace electroplating chromium, making HVOF an important alternative technology. In the future, with the development of automated spraying, robotic applications, and new powder materials, the industry will evolve towards high performance, greening, and intelligence, possessing steady growth potential.
