Abstracts

The global High-Voltage Capacitor market size is expected to reach \$ 1845 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Power quality is an important consideration for grid operators and large industrial power users who face different network challenges. Grid operators are challenged with minimizing losses over long transmission lines, integrating renewable generation (e.g., wind, solar) and providing voltage support during unplanned network events are critical in delivering efficient and reliable grids. Large industrial power consumers face the challenge of lower operating costs as well as meeting contractual conditions related to power factor and harmonic distortion to secure electrical supply. High-voltage capacitors support grid operators and large industrial power consumers alike.

Global core high-voltage capacitor manufacturers include Hitachi, Siemens, Eaton etc. The top 5 companies hold a share about 25%. Asia-Pacific is the largest market, with a share about 40%, followed by Europe and North America with the share about 23% and 16%. In terms of product, single phase is the largest segment, with a share about 60%. And in terms of application, the largest application is power generation, followed by distribution.
