A high voltage hybrid inverter is a power conversion device used in photovoltaic (PV) solar systems. It converts the direct current (DC) generated by solar panels into alternating current (AC) for use in homes or industrial applications. Unlike traditional inverters, high voltage hybrid inverters support not only solar power generation but also manage battery storage systems and interact with the grid, enabling smart energy distribution and optimal utilization. They typically operate at high voltages (usually above 600V) to increase efficiency and accommodate large-scale PV systems.
