Abstracts

The global High Voltage Jet Electrode Boiler market size is expected to reach \$67 million by 2029, rising at a market growth of 6.3% CAGR during the forecast period (2023-2029).

Global key players of high voltage jet electrode boiler include Cleaver-Brooks, Vapor Power, ACME Engineering Products, etc. The top three players hold a share over 69%. North America is the largest market, has a share about 69%, followed by Asia-Pacific, and South America, with share 23% and 5%, separately.

High Voltage Jet Electrode Boiler refers to the furnace water is directly sprayed onto the electrode for heating instead of being directly immersed in the furnace water, that utilizes water as a resistor to conduct electrical current and create heat to generate steam. The spray type maintains its heating power by the amount of water sprayed, so the amount of water sprayed is very large, and the amount of water with high power can even reach more than 1000m3/h.
