According to our (Global Info Research) latest study, the global High Voltage Water Heater market size was valued at US\$ 1317 million in 2025 and is forecast to a readjusted size of US\$ 3330 million by 2032 with a CAGR of 14.9% during review period.

High voltage water heater is a high-voltage electric heating component used in EV and hybrid thermal-management systems. It converts battery DC power into heat, warms the coolant/glycol loop, and then provides thermal energy for cabin heating, battery preheating, fast-charging temperature support, and supplemental vehicle thermal management. Key features include high-voltage compatibility, fast response, high functional safety, and close system integration.

The upstream supply chain includes heating materials and elements such as PTC ceramics, thick-film elements, heating layers, and tubular/resistive heaters, plus aluminum heat exchangers and flow paths, power electronics, control boards, high-voltage connectors, sensors, sealing materials, and engineering-plastic housings. Downstream demand mainly comes from OEMs and thermal-management Tier 1 suppliers.

In 2025, global high voltage water heater production reached approximately 16 million units, with an average global market price is \$80 per unit.
