Abstracts

Ultra Fine Magnesium Hydroxide is a kind of inorganic flame retardant made from natural brucite minerals by superfine crushing and certain surface treatment. Magnesium hydroxide flame retardant produced by brucite uses natural minerals as its source, and the whole process is basically zero emission. It can be said that from the source to the product, it meets the requirements of green, non-toxic and harmless, and is an environmentally friendly flame retardant. Therefore, it is known as 'green environment-friendly flame retardant' and has a huge market application prospect.
