Mobile learning solutions enable educators and trainers to provide real-time interactive training and instructions to the end users through the medium of smartphones and mobile devices. This not only helps to provide an interactive learning experience but also makes learning not restricted to a classroom or a training room. Furthermore the applications such as video lectures, audio & video course material, eBooks and others allow the access to information on the go which further bridges the time and distance gap between the educators and the students / employees.

The growing demand for virtual schools as one of the primary factors that will have a positive impact on the growth of this market. With the increase in adoption of different e-learning methodologies, the global education market is currently witnessing a rapid increase in the preference of students toward full-time virtual schools. In addition to benefits such as enhanced learning experience through different types of content and the ability to facilitate real-time interactive sessions with other learners and trainers, the digitization of education will also fuel the demand for virtual schools. This will result in the emergence of several mobile applications and m-learning tools that can help educators or trainers improve the overall learning process, in turn, propelling market
