## Abstracts

The global Hip and Joint Supplement for Dogs and Cats market size is expected to reach \$ 1204 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

Hip and Joint Supplement for Dogs and Cats are a class of nutritional supplements specifically designed for dogs and cats to support joint health, alleviate joint degeneration and inflammation caused by age, genetics, obesity, or sports injuries, improve mobility, and slow the progression of osteoarthritis (OA). In 2025, global Hip and Joint Supplement for Dogs and Cats production reached approximately 61,267 k units, with an average global market price of around 12 US\$/Unit. The production capacity of Hip and Joint Supplement for Dogs and Cats reaches 76,500 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for dog and cat hip and joint supplements is driven by multiple factors, including the aging pet population, increased owner awareness of pet health, improved veterinary care leading to increased preventative healthcare, and the maturing consumer perception of functional pet nutrition products. As pet owners increasingly view their pets as family members and are willing to invest more in extending their mobility and quality of life, coupled with the prevalence of hereditary joint diseases such as hip dysplasia in large breeds, the market has seen widespread adoption of scientifically formulated products containing glucosamine, chondroitin, hyaluronic acid, Omega-3 fatty acids, and novel ingredients such as UC-II collagen. At the same time, the development of e-commerce channels and the strengthening of brand education have further enhanced consumers' awareness and acceptance of joint supplements, prompting the category to shift from treatment assistance to routine daily maintenance consumption.

This report studies the global Hip and Joint Supplement for Dogs and Cats production, demand, key manufacturers, and key regions.
