Abstracts

According to our (Global Info Research) latest study, the global Hip and Joint Supplements for Pet market size was valued at US\$ 756 million in 2025 and is forecast to a readjusted size of US\$ 1204 million by 2032 with a CAGR of 6.8% during review period.

Pet hip and joint supplements are a class of nutritional supplements designed specifically for dogs and cats to support joint health, alleviate joint degeneration and inflammation caused by age, genetics, obesity, or sports injuries, improve mobility, and slow the progression of osteoarthritis (OA). In 2025, global Hip and Joint Supplement for Pet production reached approximately 61,267 k units, with an average global market price of around 12 US\$/Unit. The production capacity of Hip and Joint Supplement for Pet reaches 76,500 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for pet hip and joint supplements is driven by multiple factors, including the aging pet population, increased owner awareness of pet health, improved veterinary care leading to increased preventative healthcare, and the maturing consumer perception of functional pet nutrition products. As pet owners increasingly view their pets as family members and are willing to invest more in extending their mobility and quality of life, coupled with the prevalence of hereditary joint diseases such as hip dysplasia in large breeds, the market has seen widespread adoption of scientifically formulated products containing glucosamine, chondroitin, hyaluronic acid, Omega-3 fatty acids, and novel ingredients such as UC-II collagen. At the same time, the development of e-commerce channels and the strengthening of brand education have further enhanced consumers' awareness and acceptance of joint supplements,

prompting the category to shift from treatment assistance to routine daily maintenance consumption.
