Abstracts

The global Hoist market size is expected to reach \$ 5159 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

A hoist is a mechanical device for lifting material, typically consisting of a rope or chain around a drum or wheel lift, and a hook for attaching payload.

A basic hoist is defined by two chief characteristics. The first is the lifting medium, which may be a wire rope wrapped around a drum or a chain raised by a pulley. The second is the type of power utilized by the hoist. Common power-sources are hydraulics, electricity, air driven motors, and, in the case of a manual hoist, muscle power.

China is the largest production region of Hoist, which take about 40% of the market share. Europe is the second with 23% of the market.

Columbus McKinnon, Kito, Beijing Lieying, TBM and Terex are the leaders in the market, the top 5 take 27% of the whole market share.

This report studies the global Hoist production, demand, key manufacturers, and key regions.
