Abstracts

Hoist rings are load-centering eyebolts. They are designed to be rigged from the center or the side and may pivot or swivel. Some hoist rings connect directly to webbing, chain, or shackles. Others have a hook-end rather than a standard bail, eye, or ring.

Scope of the Report:

This report focuses on the Hoist Rings in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins.

Price in US and EU is much higher than that of China and other developing countries due to their high quality and powerful functionalities. Developing countries such as China is more likely to attract more investment opportunity for their potential demand. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The worldwide market for Hoist Rings is expected to grow at a CAGR of roughly 4.1% over the next five years, will reach 380 million US\$ in 2023, from 310 million US\$ in 2017, according to a new GIR (Global Info Research) study.
