Abstracts

The global Hoists market size is expected to reach \$ 5019 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

A hoist is a mechanical device for lifting material, typically consisting of a rope or chain around a drum or wheel lift, and a hook for attaching payload. A basic hoist is defined by two chief characteristics. The first is the lifting medium, which may be a wire rope wrapped around a drum or a chain raised by a pulley. The second is the type of power utilized by the hoist. Common power-sources are hydraulics, electricity, air driven motors, and, in the case of a manual hoist, muscle power.

The main crane manufacturers are Kito, Zhejiang Shuangniao Machinery, Zhejiang Guanlin Machinery, Columbus McKinnon and Jiangsu Bada Science Technology, etc. And the world's top five manufacturers have a total market share of nearly 26%. Regionally, the Asia-Pacific region holds the largest market share at around 39%. Among the product types of cranes, Electric Hoists account for about 53% of the market share. From an application perspective, Factories have the highest share at around 30%, followed by Construction Sites and Mining & Excavating Operation, with 17% and 10% market share, respectively.

This report studies the global Hoists production, demand, key manufacturers, and key regions.
