## Abstracts

The global Hole Saw market size is expected to reach \$ 460 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

A hole saw (also styled holesaw), also known as a hole cutter, is a saw blade of annular (ring) shape, whose annular kerf creates a hole in the workpiece without having to cut up the core material. It is used in a drill. Hole saws typically have a pilot drill bit at their center to keep the saw teeth from walking. The fact that a hole saw creates the hole without needing to cut up the core often makes it preferable to twist drills or spade drills for relatively large holes (especially those larger than 25 millimeters (1.0 inch)). The same hole can be made faster and using less power.

Leading manufacturers in the industry include Bosch, Milwaukee Tool and Wisecraft, which accounted for 13.43%, 10.99% and 8.83% of revenue in 2019, respectively. By region, Europe has the highest share of income, reaching 32.94% in 2019.

This report studies the global Hole Saw production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Hole Saw and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Hole Saw that contribute to its increasing demand across many markets.
