Abstracts

According to our (Global Info Research) latest study, the global Hole Saw market size was valued at USD 324.1 million in 2023 and is forecast to a readjusted size of USD 413.5 million by 2030 with a CAGR of 3.5% during review period.

A hole saw (also styled holesaw), also known as a hole cutter, is a saw blade of annular (ring) shape, whose annular kerf creates a hole in the workpiece without having to cut up the core material. It is used in a drill. Hole saws typically have a pilot drill bit at their center to keep the saw teeth from walking. The fact that a hole saw creates the hole without needing to cut up the core often makes it preferable to twist drills or spade drills for relatively large holes (especially those larger than 25 millimeters (1.0 inch)). The same hole can be made faster and using less power.

Leading manufacturers in the industry include Bosch, Milwaukee Tool and Wisecraft, which accounted for 13.43%, 10.99% and 8.83% of revenue in 2019, respectively. By region, Europe has the highest share of income, reaching 32.94% in 2019.
