There are two types of hollow shutters: hollow flat shutters and hollow shuttle shutters. The hollow flat shutter is also called multi-functional movable shutter. The window and blade are made of domestic high-quality aluminum alloy profiles (6063T5). The hardware fittings such as clamps, rivets, window assembly screws are made of SUS304 stainless steel. The hollow shuttle shutter sunshade adopts a hollow structure, which has the characteristics of high strength and large span. It can achieve the effect of shading, daylighting and decorating buildings through the cooperation with the glass curtain wall.
