According to our (Global Info Research) latest study, the global Holographic Foil market size was valued at USD 407 million in 2023 and is forecast to a readjusted size of USD 519.2 million by 2030 with a CAGR of 3.5% during review period.

A holographic foil is an image that is captured and printed in what appears to be three dimensions, even when it is displayed on a flat, two-dimensional surface. In some cases, holograms can be projected in full three dimensions, but a more common use of the technology is to print holographic images on special papers, cards and other surfaces. One such surface is holographic foil.

Holographic foil is made in the same way as any other metallic foil, but contains an embossed pattern that diffracts light and displays colors of the spectrum at different angles. Holographic foils come in many patterns and colors, from dots, squares, crushed ice, rainbows, pillars of light, snowflakes, and swirls.

The key global manufacturers of holographic foil are K Laser Technology, Kurz, ITW ShineMark, Uflex Limited, Zhejiang Jinghua Laser, Shenzhen Jinjia Group, Holostik, etc. The largest manufacturer is Uflex Limited with a market share of 13.84%. Global holographic foil production regions are mainly located in North America, Europe, China, Japan, etc. In terms of product categories, holographic hot stamping foil has the highest market share of 46.72%, followed by holographic cold foil with 36.22% and holographic laminate foil with the lowest share. In terms of application, personal care and cosmetics is the top application area, accounting for 37.22% of the market share, followed by food and drink with 32.76%.
