Abstracts

The global Home After-Sales Service Platform market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

The home after-sales service platform is an online platform that provides users with after-sales services such as repair, cleaning, and installation of home equipment, electrical appliances, furniture and other products. These platforms connect service providers and consumers through digital technology and the Internet, providing users with convenient and efficient home after-sales services. Typical services include appliance repair, furniture repair, home cleaning, installation services, and more. With the development of the Internet of Things and artificial intelligence, future home after-sales service platforms may become more intelligent, including functions such as intelligent fault diagnosis and intelligent navigation technicians, to enhance the intelligence level of services. Home after-sales service platforms may pay more attention to environmental protection and sustainable development, promote more environmentally friendly cleaning services, support the reparability of home products, and reduce resource waste.
