According to our (Global Info Research) latest study, the global Home Automation market size was valued at USD 46560 million in 2023 and is forecast to a readjusted size of USD 83390 million by 2030 with a CAGR of 8.7% during review period.

Home automation involves the deployment of automation technologies, which include HVAC, appliance automation, centralized controls of lighting, security mechanisms, access control for gates and doors, and devices and mechanisms, in a residential facility to enhance comfort, optimize operational costs, and prevent energy wastage.

The increased need for energy conservation in GCC is a key growth driver for this market. During 2015, the annual per capita energy consumption accounted to around 11.5 MWh in the GCC, which was much higher than other developed economies such as France, Japan, Italy, the UK, and Germany. As a result, governments in the region have called for conservative strategies in residential, commercial, and industrial buildings to solve power crisis. The use of HVAC controls, lighting controls, and other similar building automation solutions throughout the lifespan of the building can conserve power and minimize power wastage.

The Global Info Research report includes an overview of the development of the Home Automation industry chain, the market status of Apartment (Lighting Control, Security and Access Control), Villa (Lighting Control, Security and Access Control), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Home Automation.

Regionally, the report analyzes the Home Automation markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives
