Home freeze-dried pet food refers to pet staple food or snacks made by dehydrating fresh meat, fruits and vegetables at low temperatures using vacuum freeze-drying technology. It is highly nutritious, easy to store, and quick to rehydrate. It is widely used for daily feeding of cats and dogs, conditioning of picky eaters, travel portability, and nutritional supplementation during medical recovery. In 2025, global Home Freeze-Dried Pet Food production reached approximately 4433 tons, with an average global market price of around 75 US\$/Kg. The production capacity of Home Freeze-Dried Pet Food reaches 5500 tons, and the industry's gross profit margin is approximately between 40% and 60%.

The home freeze-dried pet food market is developing rapidly, mainly driven by multiple factors such as pet owners' emphasis on natural and healthy feeding concepts, their high attention to food ingredient safety and nutrient retention, the demand for convenient feeding methods brought about by the fast pace of life, the popularization of scientific pet care knowledge driving the upgrading of high-end staple food consumption, and the maturity of freeze-drying technology and the improvement of the supply chain reducing product costs. At the same time, the advantages of this category in palatability, rehydration flexibility and storage convenience further accelerate its penetration and repurchase in cat and dog households.
