Abstracts

The global Home Massage Chair market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Electric massage chairs are driven by electric motors and air pumps, relying on machinery (massage wheels) and air bags to massage, knead, and beat certain parts of the human body. The neck, shoulders, back and waist of the human body are supported by the backrest, and can be tilted backwards from a high position to a low position, so that the human body can lie on its back.

This report studies the global Home Massage Chair production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Home Massage Chair, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Home Massage Chair that contribute to its increasing demand across many markets.

Highlights and key features of the study
