Home Residual Current Detectors (RCDs) are safety devices designed to protect households from electrical shock and fire hazards caused by electrical faults. These devices monitor the electrical current flowing through the circuit and immediately cut off the power supply if a fault is detected, such as a leakage current or imbalance between live and neutral wires. Home RCDs are essential for safeguarding family members and electrical appliances, ensuring a safer living environment. They are typically installed in the main electrical panel or at individual outlets to provide comprehensive protection throughout the home.
