Abstracts

The global Home-visit Bathing Service market size is expected to reach \$ 2369 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

Home-visit bathing service refers to a professional personal care service in which trained caregivers or nurses travel to a client's residence to assist with or fully perform bathing, hygiene care, and related support for individuals with limited mobility, chronic illness, disability, or advanced age, enabling safe and dignified personal hygiene in a home setting rather than in an institutional facility.

Upstream of the home-visit bathing service market includes training institutions, certification bodies, personal care equipment manufacturers, and hygiene consumable suppliers that provide standards, skilled labor, bathing aids, and sanitation products; midstream consists of service providers such as home health agencies, independent caregivers, franchised networks, and digital booking platforms that organize, dispatch, and manage personalized bathing services; and downstream covers end users and payers including elderly and disabled clients, families, long-term care insurers, healthcare systems, and government programs that procure, subsidize, and consume these services to meet home-based personal care needs.

Current and planned projects in the home-visit bathing service sector include regional expansion initiatives by national care agencies to open training and dispatch hubs in underserved metropolitan and rural corridors, pilot programs integrating robotic assistance and AI-enabled risk assessment tools in caregiver workflows, government-backed demonstration projects linking bathing services with hospital discharge planning and community health networks, franchised service rollout plans in multiple countries,

partnership developments with insurance payers and telehealth platforms, infrastructure upgrades to mobile bathing units, and cross-sector collaborations to build certification academies and digital marketplaces that improve access, quality, and affordability of in-home bathing care at scale.
