Homeopathy is a medical practice and philosophy based on the principle that human body has the capacity to heal itself. Established in Germany in the late 1700s, homeopathy has been extensively practiced all over Europe. Homeopathy considers symptoms of illness as usual responses of the body as it tries to regain health. Homeopathy is based on the principle that 'like cures like.' According to this principle, if a substance produces a symptom in a healthy person, giving a very small amount of the same substance to that person may cure the illness. Homeopathic medicines contain extremely dilute amounts of natural substances that are used to treat a variety of ailments. Homeopathic medicines are manufactured by a process of serial dilution and succession (vigorous shaking).

Homeopathic remedies are derived from substances that come from Plant Homeopathics, minerals, or animals, such as red onion, arnica (mountain herb), crushed whole bees, white arsenic, poison ivy, belladonna (deadly nightshade), and stinging nettle. Homeopathic remedies are often formulated as sugar pellets to be placed under the tongue; they may also be in other forms, such as ointments, gels, drops, creams, and tablets. Treatments are "individualized" or tailored to each person—it is not uncommon for different people with the same condition to receive different treatments.
