In 2025, the global production capacity of honeycomb kraft packaging paper was approximately 1.64 million tons.

Honeycomb Kraft Packaging Paper is a sustainable paper-based packaging material featuring a honeycomb-structured core that provides high cushioning performance, compressive strength, and lightweight protection. It is widely used as an alternative to plastic packaging for wrapping, cushioning, and protective applications in logistics and industrial packaging. The material supports recyclability, biodegradability, and efficient material utilization while maintaining sufficient mechanical strength for transport protection.

The industrial chain of Honeycomb Kraft Packaging Paper includes upstream pulp, recycled paper, additives, and paperboard materials. The midstream covers paper forming, honeycomb structure processing, bonding, cutting, and finishing. Downstream applications focus on logistics packaging, furniture protection, home appliance transport, industrial goods shipping, and e-commerce packaging. Supporting services include customized packaging design, cutting solutions, and logistics integration to

improve protection efficiency and sustainability performance.

The honeycomb kraft packaging paper market is driven by increasing demand for sustainable and plastic-free packaging solutions across logistics and industrial sectors. Growing environmental regulations and corporate sustainability commitments are accelerating adoption of paper-based cushioning materials. Honeycomb structures offer excellent shock absorption and strength while minimizing material usage, making them attractive for cost and performance optimization. Expansion of e-commerce, furniture delivery, and appliance logistics further supports demand. As packaging users seek recyclable and biodegradable alternatives, manufacturers are investing in process efficiency and customized honeycomb designs. Overall, the market is expected to grow steadily as sustainability and protective performance become core requirements in modern packaging systems.
