According to our (Global Info Research) latest study, the global Honeycomb Packaging market size was valued at USD 7363.9 million in 2023 and is forecast to a readjusted size of USD 10720 million by 2030 with a CAGR of 5.5% during review period.

Honeycomb structures are naturally occurring or man-made that have the geometry of a honeycomb. These are used between two thin sheets to make materials for honeycomb packaging. Honeycomb structure aids the material used in packaging in reducing density and increasing shear and compression properties. This enables in minimizing the material usage and maximizes strength. Honeycomb packaging is 100% ecofriendly, lightweight, shock absorbent and does not change in dimensions with temperature variations.

The global market for honeycomb packaging is expected to expand at a considerable rate in the near future due to its growing demand across several industrial verticals. The increase application of honeycomb packaging and emphasis on environment-friendly packaging are two of the key drivers for the global honeycomb packaging market. As the demand for protective packaging grows in end-user industries such as consumer goods, automotive, and furniture among others, the honeycomb packaging market will witness significant expansion. North America led the pack in 2017 and is anticipated to have a steady growth rate over the forecast period. This is attributed to the large size of end-user industries in this region.
