Abstracts

The global Hoodies & Sweatshirts market size is expected to reach \$ 252059 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032). A sweatshirt is a collarless, long-sleeved pullover garment made of thick, soft cotton or cotton-blend fabric, typically featuring elasticated cuffs and a waistband to retain warmth. Originally designed as athletic wear to absorb sweat during exercise, it is characterized by its simple, 'crew neck' design without a hood or zipper.

A hoodie (short for 'hooded sweatshirt') is a variation of the sweatshirt that includes a hood with a drawstring to adjust the opening. It often features a large 'kangaroo pocket' on the front and may come in pullover or zip-up styles. Hoodies provide additional protection against wind and rain, making them a staple of both streetwear and functional casual wear.

Hoodies and sweatshirts have become core categories within the global casualwear and athleisure apparel market, demonstrating sustained growth in both volume and value. Compared with basic garments such as T-shirts, hoodies and sweatshirts offer greater seasonal versatility, functional performance, and stylistic flexibility. Their ability to balance comfort, warmth, and fashion appeal has resulted in high usage frequency and strong repeat purchase rates among consumers.

From a demand perspective, hoodies and sweatshirts have evolved from purely sportswear or campus apparel into mainstream lifestyle products deeply influenced by streetwear, youth culture, and contemporary fashion trends. Younger consumers, particularly Gen Z and Millennials, are the primary drivers of market growth, valuing not only comfort but also brand identity, cultural symbolism, and self-expression. As a result, collaborations with entertainment IPs, music, gaming, and esports have become an important growth engine for premium and limited-edition products. In addition, the normalization of remote work and casual living styles has further reinforced long-term demand for comfortable apparel.

In terms of product segmentation, the market is clearly tiered. Mass-market offerings focus on affordability and standard designs, dominated by sportswear and fast-fashion brands. Mid- to high-end segments emphasize fabric quality, silhouette design, craftsmanship, and brand positioning, with increasing use of fleece fabrics, functional blends, and sustainable materials. Sustainability has emerged as a key trend, driving the adoption of organic cotton, recycled fibers, and environmentally responsible manufacturing processes.

From a distribution standpoint, e-commerce platforms and direct-to-consumer (DTC) channels have significantly reshaped competitive dynamics by enabling rapid product iteration and global market access. Overall, supported by lifestyle shifts, fashion innovation, and brand-driven value creation, the hoodies and sweatshirts market continues to show solid long-term growth potential.

This report studies the global Hoodies & Sweatshirts production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Hoodies & Sweatshirts and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Hoodies & Sweatshirts that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Hoodies & Sweatshirts total production and demand, 2021-2032, (K Units)

Global Hoodies & Sweatshirts total production value, 2021-2032, (USD Million)

Global Hoodies & Sweatshirts production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)
