According to our (Global Info Research) latest study, the global Horizontal NFT System market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Horizontal Nutrient Film Technique (NFT) System is a hydroponic cultivation method designed for growing plants horizontally, typically in long, narrow channels or troughs. In an NFT system, a thin film of nutrient-rich water continuously flows over the plant roots, providing essential nutrients while allowing the roots to absorb oxygen. This method promotes efficient nutrient uptake and is commonly used for cultivating various crops, including leafy greens and herbs, in a soil-less environment.
