## Abstracts

According to our (Global Info Research) latest study, the global Horse Rug market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Horse rug, also known as a horse blanket or horse coat, is a piece of equine apparel designed to provide protection, warmth, and comfort to horses. These rugs are used in various situations, such as when horses are turned out in cold or wet weather, after exercise to prevent chilling, or during transportation to keep the horse comfortable.

There are different types of horse rugs, each serving a specific purpose. Some common types include stable rugs (for indoor use), turnout rugs (for outdoor use), fly rugs (to protect against insects), and cooler rugs (for wicking away moisture after exercise). Horse rugs are typically made from materials like polyester, nylon, or wool and may have features such as adjustable straps, buckles, and surcingles to ensure a secure fit.

The choice of a horse rug depends on factors like the horse's activity level, the weather conditions, and the specific needs of the horse to ensure its well-being and comfort.

In summary, 'sailing pants' are waterproof trousers for use in sailing, 'riding breeches' are specialized pants for equestrians, and a 'horse rug' is a protective covering for horses designed to provide warmth and comfort in various situations.
