## Abstracts

According to our (Global Info Research) latest study, the global Hospital Cash Benefit Insurances market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The hospital's cash benefit insurance provides a certain fixed amount to the insured during their hospital stay, which the person is free to use as per his/her need. Hence, an increase in out-of-the-pocket health care expenditure aids in the growth of the hospital's daily cash benefit insurance market. The inability to cover the complete medical treatment expenses is anticipated to hinder the hospital's cash benefit insurance market's growth. On average, the hospital's daily cash benefit insurance provides the insured with an amount ranging from \$100 to \$3000 per day which is not sufficient for the complete coverage of the treatment making it a supplement to the health insurance plans.

According to our Wellness & Health Research Center, the global wellness & health economy was valued at US dollars 4.8 trillion. Asia Pacific was the region with the highest spending on big health in 2022, with a total spending of \$1.68 trillion, followed by North America (\$1.42 trillion) and Europe (\$1.0 trillion). According to the health industry accounting analysis data disclosed by the Health Development Research Center of the National Health Commission, from 2019 to 2021, the market size of the health service industry grew by an average of 7.0% per year, and the specific data increased from 7.7 trillion yuan to 8.8 trillion yuan. China's health industry revenue reached 8.0 trillion yuan in 2021, with an increase of 8.1%.
