The global Hospital and Home Care Beds market size is expected to reach \$ 4476 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Hospital and home care beds are beds specially designed for hospital patients or for people in need of some form of healthcare. They have special features both for the well-being and comfort of the patient as well as convenience for healthcare workers. In 2025, global Hospital and Home Care Beds production reached approximately 3890 k units, with an average global market price of around 800 US\$/Unit. The production capacity of Hospital and Home Care Beds reaches 5200 k units, and the industry's gross profit margin is approximately between 25% and 45%.

The hospital and home care bed market has seen continuous growth in recent years, primarily driven by global population aging, an increase in patients with chronic diseases, and rising demand for long-term care. As the elderly population and the number of long-term bedridden patients rise, hospitals, rehabilitation centers, elderly care facilities, and home care settings are placing increasing demands on comfort, safety, and care efficiency, driving rapid growth in demand for electric nursing beds, multi-functional turning beds, and pressure ulcer prevention beds. The shortage of nursing staff in medical institutions has also prompted hospitals to accelerate the introduction of automated and intelligent nursing equipment to reduce the intensity of nursing labor and improve patient management efficiency. Simultaneously, the trend towards home-based elderly care and home rehabilitation has led to significant growth in the home care bed market, with consumers paying more attention to ease of operation, quiet operation, remote monitoring, and intelligent adjustment functions. The application of IoT, sensor, and AI technologies is further driving the upgrade of nursing

beds towards intelligent networking, vital sign monitoring, and data-driven care. Meanwhile, the expansion of global healthcare infrastructure and the construction of elderly care service systems continue to expand the size of the hospital and home care bed market.
