Abstracts

The global Hospital Push and Pull Latch market size is expected to reach \$ 1273.1 million by 2029, rising at a market growth of 5.3% CAGR during the forecast period (2023-2029).

The hospital push and pull latch market is expected to witness significant growth in the coming years due to the increasing demand for safety and security in hospitals and healthcare facilities. The market is expected to be driven by factors such as the growing number of hospitals and healthcare facilities, increasing awareness about hospital-acquired infections, and the need for better patient safety. Major sales regions for hospital push and pull latches include North America, Europe, Asia Pacific, Latin America, and the Middle East and Africa. North America is expected to dominate the market due to the presence of a large number of hospitals and healthcare facilities in the region. Europe is also expected to witness significant growth due to the increasing focus on patient safety and the growing demand for advanced healthcare facilities. The hospital push and pull latch market is highly concentrated, with a few key players dominating the market. Some of the major players in the market include Allegion, Assa Abloy, Dormakaba, Hafele, and Stanley Black & Decker. These companies are focusing on product innovation and development to gain a competitive edge in the market. One of the major challenges faced by the hospital push and pull latch market is the high cost of installation and maintenance. Hospitals and healthcare facilities are often operating on tight budgets, which can make it difficult to invest in expensive security systems. Additionally, the market is also facing challenges due to the increasing use of electronic access control systems, which can replace traditional push and pull latches. Despite these challenges, the hospital push and pull latch market is expected to offer significant opportunities for growth in the coming years. The increasing demand for safety and security in hospitals and healthcare facilities, coupled with the growing focus on patient

safety, is expected to drive the market in the coming years. Additionally, the increasing adoption of smart locks and access control systems is expected to create new opportunities for players in the market.
