Abstracts

Hospitals and outpatient centers are medical facilities that provide diagnostic and medical treatment to patients with a wide range of medical conditions. Outpatient care centers offer medical care or treatment that does not require any overnight stay in a hospital or medical facility. Outpatient care may be carried out in a medical office or at hospital.

Scope of the Report:

Digitalization of information related to patients including their medical histories, diagnoses, medications, treatment plans, immunization dates, allergies, radiology images, and laboratory and test results is being made possible with electronic health records (EHRs). EHRs increase patient participation and improve diagnostic and treatment outcomes.
