Abstracts

The global Hosted Access Control as a Service (ACaaS) market size is expected to reach \$ 1917 million by 2029, rising at a market growth of 16.1% CAGR during the forecast period (2023-2029).

Access control as a service (ACaaS) merges the benefits of subscription-based software as a service (SaaS) with on-site access control devices; access control hardware remains onsite, and software and servers are removed and stored at data centers, making it possible for users to control access remotely and backup and store data securely.

Essentially, ACaaS allows you to grant the right access to the right people at the right time. As the transition to the cloud continues, a key differentiator that end-users look for in their cloud solution is an unburdensome platform — ACaaS lightens the hardware load organizations have to deploy and maintain.
