Hot dip Al-Zn alloy coated sheet refers to a type of steel sheet that is coated with an aluminum-zinc alloy through a hot-dipping process. This involves immersing the steel in a molten bath of aluminum and zinc, which creates a protective layer on the surface.

The coating provides excellent corrosion resistance, improved durability, and enhanced aesthetic appeal compared to traditional galvanized coatings. The alloy composition typically includes about 55% aluminum and 43.5% zinc, with small amounts of silicon. This type of coating is commonly used in various applications, including construction, automotive, and appliance manufacturing, due to its superior performance in harsh environments.
