Abstracts

Foil stamping, typically a commercial printing process, is the application of metallic or pigmented foil on to a solid surface by application of a heated die onto foil, making it permanently adhere to the surface below leaving the design of the die. And hot foil stamping machine is the tool we used to complete the foil stamping process.

Owing to small and medium sized equipment is low-tech, and manufacturers of that are too much. In this report, we focus on precision high-tech large-scale equipment.

Scope of the Report:

This report focuses on the Hot Foil Stamping Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. China is the largest producer of hot foil stamping machine with the production of 530 units in 2016, accounting for 59.89% share globally. The follower is Europe, which produced 232 units in 2016.

At present, hot foil stamping machine produced by foreign countries are very advanced. Take BOBST as example, the company has strong R&D capabilities and their hot foil stamping machine are highly praised for the quality. However, Chinese manufacturers are dedicated to improving their technology level presently. The performance gap between Chinese companies and foreign ones are narrowing. Leading players in hot foil stamping machine industry are BOBST, YOCO, Masterwork Machinery, Gietz. BOBST is the largest manufacturer, with the production market share of 22.37% in 2016.

Under the influence of raw material, market competitions and economic conditions, the hot foil stamping machine are facing many uncertainties. In the next few years, we predict that the market will continue to keep upward tendency with fierce completion and
