According to our (Global Info Research) latest study, the global Hops LED Lighting market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Hops are one of the major ingredient used in the beer. The researchers are testing new methods for growing hops indoors, using LED lights to optimize growing conditions, make better beer. LEDs produce the perfect light on the spectrum to replace sunlight leading to decreased rooting time leading to faster growth cycles over the calendar year. And preliminary results indicate that the essential oils (the portion that produces the taste) in the hops appear to be much higher when they are grown in the greenhouse. The acids that give the hops bitterness may also be elevated.
