## Abstracts

According to our (Global Info Research) latest study, the global Hot Plate Stirrer market size was valued at USD 983.3 million in 2023 and is forecast to a readjusted size of USD 1385.8 million by 2030 with a CAGR of 5.0% during review period.

Hot plate stirrer is a portable equipment that works on the same principle of regular magnetic stirrers, but integrates a heating component or coil on the platform or board. This allows the device to maintain the sample at the required temperature while stirring. This equipment features uniform heating and rough construction to meet the rigorous laboratory necessities.

One of the primary drivers for this market is the exponential rise in the popularity of e-commerce across the globe. The growing popularity of e-commerce is making it easier for customers to browse and purchase from a wide range of laboratory-related products available online and are sold by several manufacturers. This helps the customers to make their shopping experience easier regarding comparing configurations of laboratory devices of different brands and allows manufacturers to improve their brand visibility and brand retention. Also, e-commerce has enabled manufacturers to cater to the new countries and has also maintained a simplified distribution channel.
