According to our (Global Info Research) latest study, the global Hot Rolled Pickled and Oiled (HRPO) Steel market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Hot rolled pickled and oiled steel is steel that has been descaled of an oxide film and oiled to help fight corrosion. During the pickling process, hot rolled steel is descaled in a hydrochloric acid bath. The scale-free surface benefits forming, bending, stamping, and painting both in production savings and the quality of the finished part. The pickling and oiling process produces hot rolled steel that is durable and has improved formability while providing a cleaner surface for painting with a limited barrier to rust formation.

Demand from the automotive industry: Hot-rolled, pickled and oiled steel is widely used in the automotive industry and is mainly used to produce body panels, automotive parts, etc. With the increase in automobile production and consumers' higher requirements for automobile quality, the demand for hot-rolled pickled and oiled steel is also increasing.
