The global Hot Rolled Steel Sheets for Automobile Use market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Environmental protection and energy saving needs: With the increasing global emphasis on environmental protection and energy saving, the automotive industry is facing increasingly stringent environmental protection and energy saving standards. As an important material in automobile manufacturing, hot-rolled steel plates' lightweight, high strength and excellent processing properties help reduce the weight of automobiles, improve fuel efficiency, and reduce exhaust emissions, thereby meeting environmental protection and energy-saving needs.

Safety requirements: With the improvement of automobile safety performance requirements, hot-rolled steel plates need to have higher strength and better impact resistance. The new high-strength hot-rolled steel plate has a low yield ratio, good strain distribution capability and high strain hardening properties, which can improve the safety performance of the car and protect the safety of the occupants.
