According to our (Global Info Research) latest study, the global Hotel Billing Software market size was valued at US\$ 386 million in 2025 and is forecast to a readjusted size of US\$ 669 million by 2032 with a CAGR of 8.1% during review period.

Hotel Billing Software is a digital management tool designed specifically for the hotel and accommodation industry. Its core function is to integrate the entire process of room reservation, check-in, room status management, consumption accounting, and check-out settlement. It supports unified billing for multiple business formats such as rooms, food and beverage, and recreation, automatically generates bills and integrates multiple payment methods, and also provides functions such as financial statements, customer information management, and tax compliance. It automates the entire service and financial control from guest check-in to check-out, improving hotel operational efficiency, customer experience, and financial transparency.

Hotel billing software is undergoing a comprehensive shift from standalone on-premise billing tools to cloud-native integrated platforms tightly connected with PMS, POS, channel management and guest loyalty systems, as hotels prioritize contactless self-service settlement and unified folio management covering rooms, catering, spa and conference consumption. Embedded AI capabilities support automatic night audit, dynamic pricing adjustment, revenue leakage identification and intelligent financial reporting, while multi-channel mobile payment, digital invoicing and regional tax compliance modules become standard configurations to meet varying regulatory requirements worldwide. Vendors are moving away from one-time licensing toward modular SaaS subscription models, launching differentiated packages for luxury hotel groups, mid-chain hotels and independent boutique properties, with multi-property

centralized billing emerging as a core competitive feature. Meanwhile, cross-border hospitality drives demand for multi-currency settlement and cross-region financial reconciliation functions, and the market witnesses intensified cooperation between global hospitality tech giants and local vertical software developers to deliver localized, fully compliant billing operation solutions.
