According to our (Global Info Research) latest study, the global Hotel Energy Management System market size was valued at US\$ 1062 million in 2025 and is forecast to a readjusted size of US\$ 1860 million by 2032 with a CAGR of 8.4% during review period.

A Hotel Energy Management System (HEMS) is a digital management platform that integrates IoT sensors, smart controllers, and a data platform to monitor and dynamically optimize hotel HVAC, lighting, water supply, and power equipment in real time. This system collects guest room occupancy status, environmental parameters, and energy consumption data. Through the PMS interface, it automatically adjusts temperature upon check-in/check-out and cuts off power to save energy when no one is seated. Simultaneously, it uses AI algorithms to predict and adjust the load of central units, laundry rooms, and kitchen exhaust fans, eliminating standby power consumption and hidden leaks while maintaining human comfort thresholds. Essentially, it is a technological vehicle for transforming extensive energy consumption expenditures into refined carbon asset management.

The global HEMS market is valued at \$1 billion by 2025 and is projected to grow at a CAGR of 8.60%. The driving force is shifting from 'cost savings per store' to brand ESG competitiveness: the EU Building Energy Efficiency Directive and China's 'Gold Leaf' green hotel certification are forcing upgrades to existing facilities; AI digital twins will replace static strategy tables, enabling real-time negotiation between chiller production scheduling and spot electricity prices; and wireless passive sensors and the 'energy as a service' model are significantly lowering the deployment threshold for boutique hotels. In the next five years, the fifth-generation system, integrating mobile room control,

demand-side response, and carbon tracking, will become a standardized configuration for chain groups, and energy efficiency indicators will be directly linked to OTA recommendation weights and business travel procurement lists.
