According to our (Global Info Research) latest study, the global Hotel and Hospitality Management Software market size was valued at USD 2614.2 million in 2023 and is forecast to a readjusted size of USD 3672.7 million by 2030 with a CAGR of 5.0% during review period.

Hotel and hospitality management software is used to aid in the hotel, restaurant, spa, and other hotel-based recreational operations. This software mainly assists with ordering, billing, inventory management, queue management, guest response management, and others.

The rapid growth in the tourism and the hospitality industry is the major factor driving the growth of the hotel and hospitality management software market. Tourism and hospitality industry is considered as the third largest sub-segment in the services sector which includes trade, repair services, hotels, and restaurants. Business hotels contribute a major share in the growth of the hotel and hospitality management software market. The increased facilities that are provided by the business hotels such as unified communication capabilities help the business people and other guests to conduct meetings and conferences. Thus it is estimated that this segment will register a comparatively high growth in the future years.

The Global Info Research report includes an overview of the development of the Hotel and Hospitality Management Software industry chain, the market status of Under 200 Rooms (On-premises, SaaS-based), 200 to 399 Rooms (On-premises, SaaS-based), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Hotel and Hospitality
