The global Household Appliance Oxygen Sensor market size is expected to reach \$ 136 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

In 2025, the global sales volume of Household Appliance Oxygen Sensor was approximately 6.5 million units, with a mainstream manufacturer-level average selling price of about USD 13.5 per unit. The gross margin of major manufacturers in the industry was approximately 30%-45%.

Household Appliance Oxygen Sensor is a type of oxygen detection sensor used in household or small civil appliances. It is mainly used to detect oxygen concentration, oxygen content during combustion, or oxygen-deficiency risk, and convert changes in oxygen content into electrical signals for appliance control systems to perform combustion control, safety protection, oxygen concentration monitoring, or indoor air environment management. In terms of technology route, Household Appliance Oxygen Sensor mainly includes zirconia type, electrochemical type, and ultrasonic type. Zirconia type is more suitable for high-temperature or combustion environments, and can be used in gas water heaters, wall-hung boilers, ovens, steam ovens, and other equipment; electrochemical type is mainly used for room-temperature oxygen concentration detection; ultrasonic type is commonly used for oxygen concentration and flow detection in household oxygen concentrators.

The upstream mainly includes ceramic sensing elements, electrochemical gas sensing units, ultrasonic transducers, signal conditioning chips, PCBs, housings, connectors, and packaging materials. The midstream covers oxygen sensor design, packaging, calibration, and testing. The downstream is mainly oriented toward household gas

appliance, kitchen cooking appliance, household health appliance, and indoor air equipment. With the development of smart home appliances, rising safety protection requirements, and growing demand for household health appliances, Household Appliance Oxygen Sensor is gaining increasing application value in combustion control, oxygen-deficiency protection, oxygen concentration monitoring, and indoor air environment management.
