## Abstracts

The global Household Vehicles Antifreeze market size is expected to reach \$ 5321.6 million by 2029, rising at a market growth of 1.5% CAGR during the forecast period (2023-2029).

The development trend in household vehicles antifreeze is focused on improving the efficiency and environmental impact of the product. Manufacturers are developing antifreeze products that are free from harmful chemicals like ethylene glycol, which is toxic to humans and animals. These eco-friendly formulations are biodegradable and have a lower impact on the environment. Antifreeze products are being designed to have a longer service life, reducing the need for frequent replacements. This not only saves money for consumers but also reduces waste and the environmental impact of disposal. Antifreeze products are being formulated to have better heat transfer properties, ensuring efficient cooling of the engine. This helps in maintaining optimal engine performance and reducing the risk of overheating.
